DETAILED ACTION

1. This is in response to Applicant's arguments filed 17 December 2004, with respect to claims 1-15 have been fully considered and are persuasive. Therefore, the rejection of last Office action has been withdrawn.

2. Claims 1-15 remain pending for examination.

Information Disclosure Statement

3. The information disclosure statements (IDS) filed on 28 January 2005 comply with the provisions of MPEP 609. They have been placed in the application file. The information referred to therein has been considered as to its merits.

REASONS FOR ALLOWANCE

4. With respect to claims 1-15 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

With respect to claim 1, the claimed features "a method for creating a user-defined type in a database system, and methods that can be invoked on instances of the user-defined type; a first requirement that the class specify one of a plurality of different formats for persisting instances of the user-defined type in a database store; performing said receiving, enforcing, and enabling steps to create a user-defined type in the context of a first database performing said receiving, enforcing, and enabling steps to create a user-defined type in the context of a second database; and determining whether the user-defined type created in the context of the first database is equivalent to the user-defined type created in the context of the second database" in conjunction with other elements of the independent claims would not found anticipated or obvious over the prior art made of record.

The dependent claims, being definite, further limiting, and fully enabled by the specification are also allowed.

The closest prior art, Kriens et al., U.S. Patent Number 5,864,862 relates to a system and method for decreasing coupling between functions and actual data types in an object-oriented programming and execution environment. Bannon et al., U.S. Patent Number 5,297,279 relates to a system and method providing support for long-term storage and retrieval of objects created by application programs written in object-oriented programming languages but fail to teach the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
